Kenji lives in Yokosuka. One hot day in August, when he went to Yokohama, he thought it was a little hotter in Yokohama than in Yokosuka. On the night of the day, Kenji collected *data about *temperature of five cities in Kanagawa *Prefecture, Yokohama, Yokosuka, Ebina, Fujisawa, and Odawara. He also collected *monthly average temperature and *monthly average maximum temperature in each city in August and made a chart.

We can see a lot of interesting things from Chart. About monthly average temperature, only Odawara is under twenty-six *degrees. About monthly average maximum temperature, Ebina is the highest of the five cities. Yokohama is higher than Yokosuka both in monthly average temperature and in monthly average maximum temperature. Fujisawa is higher than Yokosuka in monthly average temperature, but it is not as high as Yokosuka in monthly average maximum temperature.

Chart

City	A	B	C	D	E
Monthly Average Temperature (°C)	26.7	26.3	26.5	25.9	26.6
Monthly Average Maximum Temperature (°C)	30.6	30.4	31.2	30.0	30.1
